Adopt a Star in the Discovery Center's planetarium!

Your adopted Star name will be entered in the Discovery Center's Digital Sky database and be visible during every showing of "Tonight's Sky". Every year thousands will see the name of your adopted Star in our 40' dome theater! Name an adopted star for yourself or dedicate a star to a loved one. You pick the constellation and we will select the brightest available star in that constellation for your adoption. Here's what you get...

Star level - \$125. A beautiful framed 8"x10" certificate with your Star circled, your Star name projected during every "Tonight's Sky" for one year, plus two passes to see your star in "Tonight's Sky".

Galaxy level - \$1000. All of the features of the Star level plus your Star name will be visible during every "Tonight's Sky" for 10 years!

By adopting a Star you are also supporting the educational mission of the Discovery Center!

**Please enter your adopted Star name in the blocks below.
There is a limit of 20 characters, including spaces.
Names are subject to approval by Discovery Center staff.**

20 empty square boxes for entering the star name.
