

HOT AND GOLD PLANETS

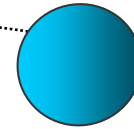

SUN

MERCURY
4 points

VENUS
5 points

EARTH
3 points

MOON
1 point

MARS
2 points

MERCURY IS CLOSEST TO THE SUN. WHY IS VENUS WORTH MORE POINTS?

ONLY FOUR OF THE NINE PLANETS ARE SHOWN – THE FOUR THAT ARE CLOSEST TO THE SUN. CAN YOU NAME THE MISSING FIVE PLANETS?

How to Play

Take turns rolling the special die to land on the planets or moon.

The hottest or warmest planets are worth the most points.

List your points as you get them.

The game ends when both you and your partner have visited each of the planets and moon. You may visit a planet more than once.

The winner is the one who has the most points (is the hottest!).
